PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience in android and web development. Proven track record of contributing to real-world ERP migration project and shipping production ready cross platform mobile application.

TECHNICAL SKILLS

Mobile & Cross-Platform	Flutter, Kotlin, Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), Jetpack Compose, BLoC, MVVM
Web Development	React.js, Node.js, Express.js, Django, Django REST Framework
Database Management	MongoDB, MySQL, PostgreSQL, Firebase, Supabase
Tools & Workflow	Git, Postman, Figma, Linux CLI

EDUCATION

B.Tech Information Technology | Vellore Institute of Technology, Tamil Nadu, India.
2021-2025

High School (10+2) | Capital College and Research Center, Kathmandu, Nepal.
2018-2020

Secondary Education Examination (SEE) | Kathmandu University High School, Kavre, Nepal.
2018

WORK EXPERIENCE

1 year +

Junior Android Developer | Dynamic Technosoft, Sankhamul Sep 2025 – Mar 2026

- Completed the migration of a legacy native android ERP application to Kotlin Multiplatform (KMP), enabling code sharing for Android and iOS platforms.
- Assisted in refactoring XML-based UI components into KMP shared logic utilizing Jetpack Compose.
- Implemented shared business logic using KMP to ensure consistent functionality across Android and IOS platforms while supporting platform-specific optimizations.
- Collaborated with team members to integrate RESTful APIs, ensuring seamless data synchronization between the migrated app and backend services.

Flutter Developer Intern | Susankya Global, Kuponhole Aug 2023 – Dec 2023

- Developed a community-focused mobile application with Flutter, employing the Bloc state management library.

- Learned to build backend systems using Django Web Framework.
 - Integrated Khalti payment gateway using its Android SDK.
 - Wrote technical documentation for software features, streamlining onboarding for future interns and team members.
-

PERSONAL PROJECTS

GS Image Generator | *MERN Stack, Gemini API, Stability AI, Cloudinary*

Full-stack AI image generation platform where users input text prompts to generate images via Gemini and Stability AI APIs. Features image sharing, community browsing and Cloudinary backed media storage.

Hoodster | *MERN Stack, Cloudinary*

Designed and developed a responsive e-commerce web application using the MERN stack. Implemented core features such as product listings, shopping cart, user authentication, and order management. Focused on performance, clean UI, and scalable architecture.

Blog App | *Kotlin, Firebase, Node.js*

Twitter inspired android social app where users create posts, follow others and browse a personalized feed. Built with Dagger-Hilt, Coroutines Flow and MVI architecture. Uses Cloud Firestore for data, Firebase Storage for images and Cloud Functions for server-side logic.

Movique | *Kotlin Multiplatform (KMP), Compose Multiplatform (CMP)*

Cross-Platform movie browsing app built with Kotlin Multiplatform, sharing UI and iOS via Compose Multiplatform. Demonstrates real-world KMP project structure with platform-specific entry points for each target.

Dash Blog | *Flutter, Supabase*

Built a clean architecture Flutter blog application integrated with Supabase for backend services. Features include user authentication, post creation/editing, and real-time updates. Focused on scalability, UI responsiveness, and maintainable code structure.

Pixel Adventure | *Flutter, Flame Engine*

Developed a 2D platformer game using Flutter and the Flame engine. Focused on character animation, physics-based movement, collision detection, and level design. Prioritized performance optimization and visual consistency across devices.

Hisabkitab | *Flutter, BLoC,*

Offline first expense tracker built for elderly Nepali users with a fully Nepali language UI. Features expense categorization, weekly grouping, spending visualization via graphs and swipe to delete, all stored locally with no login required.

Optical Character Recognition | *Python, OpenCV, Tesseract, LLaMA-3*

Built a modular OCR pipeline for printed Nepali text using OpenCV, fine-tuned Tesseract, and LLaMA-3 for post-processing for final year project; achieved 80.3% word accuracy and outperformed standard OCR tools in structured content preservation.
